

COMPENG 2SH4 Project – Statement of Contribution

Your Group Number _____ Chloe&Paula _____

Your Name _____ Chloe Chung _____

Your Team Member's Name _____ Paula Medina Diaz _____

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.
 - Iteration 1a
 - Iteration 2a
 - Iteration 3(with Paula)

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.
 - Iteration 1b
 - Iteration 2b
 - Iteration 3
 - Bonus features

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

When we first started working on your project, it was hard to coordinate times to work on it together so we worked on iteration 1 separately. On iteration 2, we started off separately but eventually got together to finish it as well as do iteration 3. Takeaways from this project are that it is much easier to work on the code while physically in the same place, since this eliminates issues with different versions and makes it much easier to communicate and implement our ideas.
